Digital Printing and Imaging Solutions Ltd.

Creative, Strategic & Innovative Digital Printing Solutions

ABOUT US

We have been in the graphics business since 2000. Our roots are in sign painting, billboards, neon signs, and screen printing. Collectively our staff represents years of experience serving graphic needs to our customers. We are dedicated to providing outstanding products and outstanding customer service. Our team brings a work ethic that reflects in superior quality products, done right, on time and at a great price.

Billboards and Event Banners

Banners are most commonly used for street signage and also in many retail environments. Great attention getters and well suited for either long or short term use. We offer large format printing for both front lit and back lit billboards.

Vehicle Graphics and Branding

We can provide custom lettering and logo adhesives to dress up your vehicles and spread the word around town. To make a bigger splash, we can wrap your entire vehicle with a custom full color design. We will help you take advantage of the free AD space your vehicles provide.

Posters and Backlit Signs

Edge Lighting and POS Displays

Custom engraved graphics on clear plastic or perspex, with LED lit channel systems. Available in desktop or wall mounted. Ideal for POS displays promoting brand recognition. EDGELIT technology is an innovative way of providing elegant informational lighting.

Retro-reflective Road Signs

We manufacture high quality sign posts and road signs with retro-reflective technology that makes our signs visible at night and when wet. We offer a 5 year performance guarantee against fading and weathering.

Roll-up Banners and Retractable Banner Stands

Roll-up banners are used for presentations, event promotion and at points of sale. They are durable and easy to transport. High resolution images can be printed on paper, mesh, canvas or vinyl.

Pole Banners

Pole Banners are most commonly used for street signage and retail environments to promote events. Graphic content is generally vertical.

Sign Posts

Road Safety Signage

At DPI we offer a wide range of innovative digital print and display solutions that meet international standards. We are continually striving to strengthen our customer relations by partnering and collaborating with our clients to create and provide the kind of image you will be proud to display. We offer high impact, full color digitally printed graphics, signs and a wide range of outdoor display solutions. With our state of the art equipment, computer aided sign technologies and a host of imaginative ideas, we are committed to providing you with quality products, done right, on time and at a great price.

Litter Bin Graphics

Window Graphics

Using one way vision film, see the graphics from outside, see through the graphics from the inside

Make Sure Your Files Are Print-Ready

1) Acceptable File Formats

For digital printing photoshop(.psd, .tiff, or .eps) if manipulation is required, the file type must be .psd with layers. All fonts must be included.

Illustrator (.eps or .ai) Must include link files and font folders or outline text. Images must be linked and not embedded.

QuarkExpress (.qxd) Link files and fonts must be included. Photos, logos, fonts, etc. are not auto embedded. These items must be included in the zip files or CD.

2) Unacceptable File Formats

.pdf, .jpeg, .ppt, .gif

3) Resolution of File

Digital prints require a min. resolution of 150 dpi at 100% file size or 300 dpi at 50% file size

4) Submitting Art Files

All fonts and link files need to be included. Files smaller than 5-10MB may be emailed. Up load files up to 50MB using our FTP site at www.emagemediagroup.com. If the file size is larger, files must be sent on DVD or CD.

Application Service

To complete the picture, we'll execute and coordinate the application of the graphics we produce.

Whether the graphics are being applied to a portable substrate, a banner, a metal or plastic sign blank, flex banner material for lighted signs, even vehicles, when logistics permit we can do the application, even if the project requires on site application.

We can administer aspects of the removal and application process, no matter the location, providing you with a complete and professional turnkey project: done right, on time and at a great price
